

RZ Resources

The Copi Mine Project

Environmental Impact Statement

Amendment to State Significant Development Application

JANUARY 2025

RZ Resources (RZ) announces key updates to its State Significant Development Application for the Copi Project. Following extensive community consultation and feedback received during the 2024 Environmental Impact Statement (EIS) public exhibition, RZ is preparing two comprehensive reports for submission to the NSW Department of Planning, Housing and Infrastructure (DPHI).

An Amendment Report will detail proposed amendments to the project, including modifications to the proposed Mine Site as per the map below. The amendment will include:

- Modified mining operations and infrastructure layout to safeguard future mining areas and enhance environmental protection.
- Expectation that the Nulla Road modification is no longer required.

This report outlines environmental impact assessments and mitigation strategies for all proposed changes. Complementing this, the Submissions Report addresses feedback received from stakeholders during the EIS exhibition period.

These reports reflect ongoing engagement with local communities, council representatives, government agencies, First Nations stakeholders, landowners, and community members. Both documents will be available for public review on the NSW Major Projects Planning Portal at www.planningportal.nsw.gov.au in early 2025.
